

Mothers
die
globally
For Every
100,000 births

Healthcare equity for women is unrealised global goal especially in our country where societal and cultural factors have major bearing on a woman's overall health and well being.

Preeclampsia
a hypertensive disorder of pregnancy, is a leading cause of morbidity and mortality among mothers and babies.

more than 70,000
maternal and
500,000 fetal lives
lost worldwide
(per year, as of 2019)

**Early Detection can Help
save these lives.**
